

Polytype Converting is your supplier of coating technologies and lines for the surface finishing of a wide range of flexible films and papers for the highest demands. Our activities are primarily oriented towards our customers and their products. As a leading technology provider in our segment, we develop integrated solutions that meet our customers' requirements in terms of quality, productivity and optimized product costs.

For our location in Fribourg, we are looking for a

MECHANIC/PROCESS TECHNICIAN for our Technical Center (m/f/d)

Your tasks

- Set-up and operation of our in-house test lines (coating facilities - Techma 1 and Techma 2)
- Technical preparation for trials
- Adjustment, monitoring and control of the lines during application tests and customer visits in cooperation with our process engineers
- Maintenance and servicing of the Techma lines
- Collaboration in the optimization of manufacturing processes
- Establishment of the machine protocol

Your profile

- Completed training as a mechanic/assembler or comparable technical training
- Professional experience in the assembly of coating machines
- Good knowledge of our coating systems is an advantage
- Distinct problem-solving thinking
- Strong customer-oriented communication skills
- Flexibility, ability to cooperate and work in a team
- Knowledge of German or French, ideally also English
- Joy of working independently and on your own responsibility

You can expect a varied field of activity with many opportunities for development. We look forward to receiving your convincing application documents, stating your earliest possible starting date and your salary expectations. Please send your application in pdf format and combine all documents in one file.
